
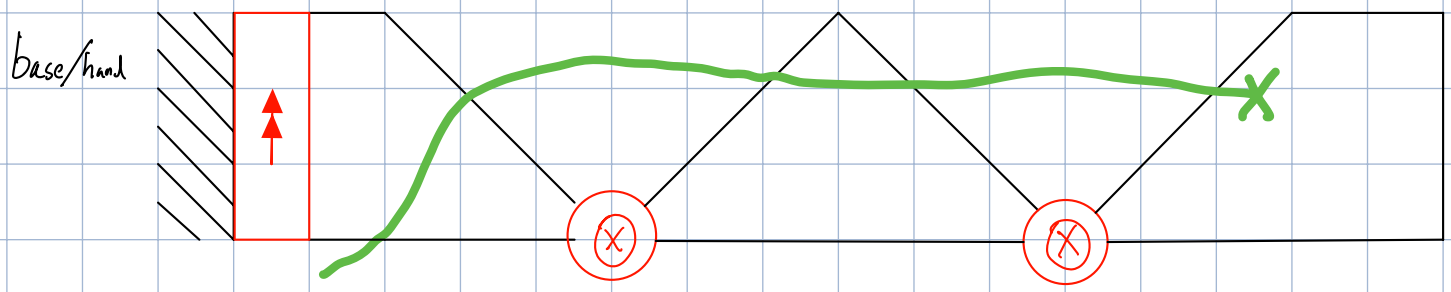
Mechanical

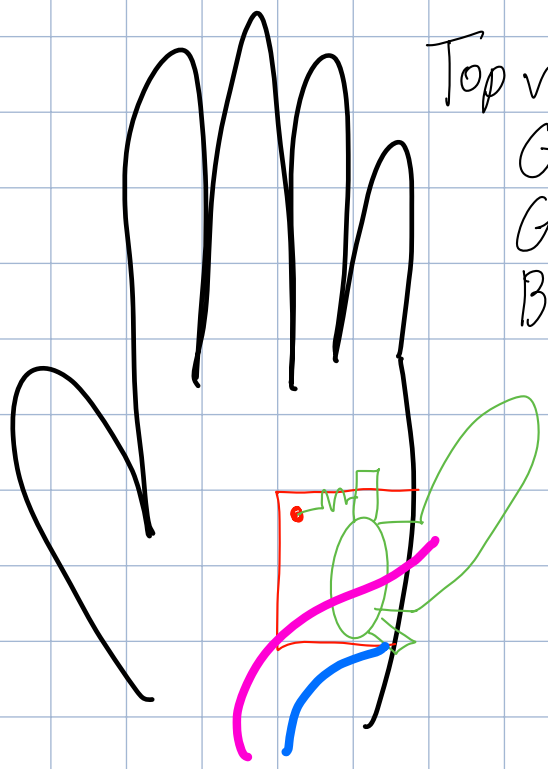
Angled sections to allow tight curl with 3 sections (like bones in a thumb)

OR smaller sections for a more tentacle like digit (these would still be triangular)



Wire/Bowden cable for curl (green)

3 revolute bearings (red)



Top view of right hand

Green oval can rotate

Green spring pulls digit towards fingers when unpowered

Blue cable connects to arm mounted motor to control rotation

Pink cable connects to arm mounted motor to control curling
